*Pablo Picasso* Victoria Charles, 2011-07-01 Picasso was born a Spaniard and so they say began to draw before he could speak As an infant he was instinctively attracted to artist s tools In early childhood he could spend hours in happy concentration drawing spirals with a sense and meaning known only to himself At other times shunning children s games he traced his first pictures in the sand This early self expression held out promise of a rare gift M laga must be mentioned for it was there on 25 October 1881 that Pablo Ruiz Picasso was born and it was there that he spent the first ten years of his life Picasso s father was a painter and professor at the School of Fine Arts and Crafts Picasso learnt from him the basics of formal academic art training Then he studied at the Academy of Arts in Madrid but never finished his degree Picasso who was not yet eighteen had reached the point of his greatest rebelliousness he repudiated academia s anemic aesthetics along with realism s pedestrian prose and quite naturally joined those who called themselves modernists the non conformist artists and writers those whom Sabart s called the lite of Catalan thought and who were grouped around the artists caf Els Quatre Gats During 1899 and 1900 the only subjects Picasso deemed worthy of painting were those which reflected the final truth the transience of human life and the inevitability of death His early works ranged under the name of Blue Period 1901 1904 consist in blue tinted paintings influenced by a trip through Spain and the death of his friend Casagemas Even though Picasso himself repeatedly insisted on the inner subjective nature of the Blue Period its genesis and especially the monochromatic blue were for many years explained as merely the results of various aesthetic influences Between 1905 and 1907 Picasso entered a new phase called Rose Period characterised by a more cheerful style with orange and pink colours In Gosol in the summer of 1906 the nude female form assumed an extraordinary importance for Picasso he equated a depersonalised aboriginal simple nakedness with the concept of woman The importance that female nudes were to assume as subjects for Picasso in the next few months in the winter and spring of 1907 came when he developed the composition of the large painting Les Femmes d'Alger (O. J. R. M.) Just as African art is usually considered the factor leading to the development of Picasso s classic aesthetics in 1907 the lessons of Cezanne are perceived as the cornerstone of this new progression This relates first of all to a spatial conception of the canvas as a composed entity subjected to a certain constructive system Georges Braque with whom Picasso became friends in the autumn of 1908 and together with whom he led Cubism during the six years of its apogee was amazed by the similarity of Picasso s pictorial experiments to his own He explained that Cubism s main direction was the materialisation of space After his Cubist period in the 1920s Picasso returned to a more figurative style and got closer to the surrealist movement He represented distorted and monstrous bodies but in a very personal style After the bombing of Guernica during 1937 Picasso made one of his most famous works which starkly symbolises the horrors of that war and indeed all wars In the 1960s his art changed again and Picasso began looking at the art of great masters and based his paintings on ones by Velazquez Poussin Goya Manet Courbet and Delacroix Picasso s final works were a mixture of style becoming more colourful expressive and optimistic Picasso died in 1973 in his villa in Mougins The Russian Symbolist Georgy Chulkov wrote Picasso s death is tragic Yet how blind and naive are those who believe in imitating Picasso and learning from him Learning what For these forms have no corresponding emotions outside of Hell But to be in Hell means to anticipate death The Cubists are hardly privy to such unlimited knowledge

**Improving Palliative Care for Cancer** National Research Council, Institute of Medicine, National Cancer Policy Board, 2001-10-19 In our society's aggressive pursuit of cures for cancer we have neglected symptom control and comfort care Less than one percent of the National Cancer Institute's budget is spent on any aspect of palliative care research or education despite the half million people who die of cancer each year and the larger number living with cancer and its symptoms *Improving Palliative Care for Cancer* examines the barriers scientific policy and social that keep those in need from getting good palliative care It goes on to recommend public and private sector actions that would lead to the development of more effective palliative interventions better information about currently used interventions and greater knowledge about and access to palliative care for all those with cancer who would benefit from it
